Section 3: Matters for Discussion

3.1 Physical Advertising

Will go ahead and make the plastic and wooden items but the screens are cancelled as we can't get a grant for advertising items and they are too expensive.

3.2 Event Grants

We want to run a game jam and git teaching sessions next year but nothing that requires funding on short notice.

3.3 TUSA/ATO Tax Changes

Nothing has been said by TUSA so nothing to talk about. Will complete change of registration form soon.

3.4 Constitution Amendments

Accepted amendments: Extended membership, Associate project rules, Club project wound up clause, TUSA wound up clause, Committee/Executive definitions, General member temp elevation, temp power transfer, office splitting by campus, General member elections, no cease to be a member clause, meeting attendance requirements, meeting rescheduling, two members for changing poll method, AGM before end of march, financial year and treasury reporting period, wording fixes for club convened meetings, rounded up requirements for AGM Quorum, elections at other GMs, 4 week committee change over, general wording changes and move from word to typst, officer naming.
Rejected amendments: Switch to 2/3 approval for constitutional amendments(Want 50% + 1, not 2/3).

MOTION Movers: Charles (Kat) Carolan; Cameron Munro; Tran, Hau Duc; Lachlan McKay; and Johannes (Joey) Nicholas that the constitutional amendments in the appendix were discussed and adopted by a 50% majority of present members

3.5 Membership Fees

3.9 Committee Handover

The outgoing committee is to hand over all important documents (digital and hard copies), club property and contact lists, TUSA website - Club portal details to the incoming committee. The outgoing committee is also to grant admin access to the Programming Club's social media pages, cloud data storage, financial management information, asset register and any relevant tools used by the Programming Club's and arrange a time and date to change over bank account access. It will also begin a general discussion on any Programming Club's traditions and advice on what went well during the year and what could be improved.

Section 4: Matters for Noting

4.1 President's Report

This year has been crazy for us, with the previous committee throwing us in at the deep end as they were too busy at the end of last year to help out. Then, there was an unscheduled meeting to elect a new committee as soon as the university year started. This ensured we had to figure things out as we went, like the mandatory re-affiliation in March, which we were informed about just weeks from the deadline. Then, on to event and grant applications, which kept us on our toes as we tried to run events of interest to our members, as none of us were prepared for the amount of admin required. On that front, we have spent most of our time this year helping students gain experience programming, ideally in a different way from what they would learn while completing a UTAS course and, hopefully, complementary. We have tried to do this via our weekly meetups both on campus and online by focussing on running a number of club projects that members can work on to get more comfortable with working on collaborative projects. These include a Discord bot and a classic text adventure. When we were not busy with projects, we worked with other clubs to run collaborative events, like the games nights we ran with MAPS earlier in the year and the STEM ball, which we are happy was able to run again, and hope it can continue to happen for years to come! And, of course, we can not forget to thank TUSA for providing grants, which made both club events and the recent stem ball possible.
